

Please obtain and copy of the follow which is available for less than £2 as a used edition from Amazon:

Head Start to A-Level Physics bridging the gap between GCSE and A-Level (CGP A-Level Physics)

ISBN-10: 1782942815

Be honest with yourself and spend at least 5 hours reading, taking notes and then answering practice questions on your areas of weakness from GCSE.

I fully encourage students to spend significantly more time than this completing the task.

It is essential you bring in evidence of your summer work for the first A-Level lesson.

If your Maths is a weakness, you can use the following textbook to get Maths ready for the course. Again, if you choose to prepare using this book, I expect to see the equivalent to at least 5 hours' worth of work evidenced from this text.

A-Level Physics: Essential Maths Skills

ISBN: 9781782944713
